VITRIP	<i>Vitis riparia</i>	riverbank grape	FAC
XANSTR	<i>Xanthium strumarium</i>	rough cocklebur	FAC

Code(s)	Scientific Name	Common Name	Indicator Status
---------	-----------------	-------------	------------------

¹ Noxious weed located in the vicinity of Y15210422L3 and Y15010430L2

² It is highly probable that more species of Carex are found along the rivers. Species were identified following the field survey. Plants were only in vegetative stages in subsequent surveys. Based on morphological features, the indicator status is accurately identified, even if more species exist.

³ Noxious weed common throughout the area

⁴ Noxious weed common throughout the area

⁵ Noxious shrub located near Y15210422L3 and in Y15010415L2
