**Subject:** ND State Land Dept. Info - New well on minerals to be auctioned in August

On June 9, 2010, Newfield Production Company spud the Megamouth 1-8H well on unleased state minerals in McKenzie County, T150N-R98W, Section 8. Leases 10-02960 and 10-02961 cover the state's 40 net mineral acres in the 640 acre spacing unit for this well, and represent a 6.25% working interest.

Although we have not received an invitation to participate or AFE for this well, we wanted to make sure all potential bidders knew that a well has already been drilled on this acreage.
