FOR IMMEDIATE RELEASE

The State of North Dakota has retained EnergyNet, Inc. to auction potash and associated subsurface mineral leases

—AMARILLO, TX, April 6, 2011, (www.energynet.com) —

EnergyNet is pleased to announce that the State of North Dakota has retained EnergyNet’s services to develop and host an online auction for the state’s offering of potash leases and associated subsurface minerals in Burke County, North Dakota. The state has given notice that the leases will become available for online research, at EnergyNet.com, subsequently opening for bids online. Sale information is available at the following URL:

<http://gov.energynet.com/nd/potash/2011/04/>

The sale group list will be posted on the EnergyNet website. A two-week due diligence period begins for all tracts on April 12, 2011 at 10:00am CDT. The one-week online auction bidding period for all tracts shall begin 10:00 AM CDT on April 26, 2011. Specific opening and closing times for each tract will be listed on the website.

“EnergyNet is elated to assist the State of North Dakota with this first-ever online auction of subsurface mineral leases,” says Bill Britain, EnergyNet President and CEO. “We look forward to a mutually beneficial relationship with the State of North Dakota.”

Bidders may register and prequalify for bidding on EnergyNet.com at any time. Specific instructions and user guides for this potash lease sale will be available on the EnergyNet website no later than April 12th, 2011 at the above Internet address.
